

Risk Disclosure Statement for Retail Clients Trading CFDs and Forex

Interactive Brokers (U.K.) Limited ("IBUK") offers trading in **Contracts for Differences ("CFDs")** on shares, indexes, foreign currencies and/or other underlying products. IBUK also provides **spot trading of foreign currencies ("Spot FX")**, including on a leveraged basis. In this document, "**Forex**" refers to both Spot FX and foreign currency CFDs.

This document describes the characteristics and risks of trading CFDs ([Part A](#)) and Forex ([Part B](#)).

CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage.

62% of retail investor accounts lose money when trading CFDs with IBUK.

You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

PART A: CFD Risk Disclosure

1. Trading CFDs is high risk, and you could lose all the money you invest

1.1. CFD trading is highly risky due to the speculative and volatile markets in these products and the leverage can **increase both gains and losses**.

1.2. Before trading CFDs, you should carefully assess your **financial situation and risk tolerance**. CFDs are not suitable for all investors. Only trade them if you are an experienced investor who understands the risks involved and can afford to lose the money you invest.

1.3. Trading **shares or exchange-traded funds without using margin** is less risky than trading **leveraged CFDs** on shares or indexes.

2. No investment, tax or trading advice

2.1. IBUK does not provide investment, tax or trading advice. Our service is "execution only", meaning we are only acting on your instructions. We will not advise you on any transaction, nor will we monitor your trading decisions to determine if they are appropriate for you or to help you avoid losses.

2.2. You should obtain your own financial, legal, taxation and other professional advice as to whether CFDs are an appropriate investment for you.

3. CFDs are not traded on a regulated exchange and are not cleared on a central clearinghouse

3.1. CFDs are private agreements between you and IBUK. They are not traded on a regulated exchange and are not cleared on a central clearinghouse.

3.2. This means that exchange and clearinghouse rules and protections do not apply to trading CFDs with IBUK.

4. You are subject to counterparty credit risk on CFD trades

4.1. As IBUK is your counterparty for CFD trades, you are exposed to the financial and business risks, including credit risk, associated with dealing with IBUK. That is, in the unlikely event that IBUK were to become insolvent, it may be unable to meet its obligations to you.

4.2. IBUK is a participant in the UK Financial Services Compensation Scheme ("FSCS"). You may be entitled to compensation from the FSCS in the event we cannot meet our obligations.

4.3. Further information about compensation is available from the UK Financial Services Compensation Scheme at <http://www.fscs.org.uk>.

5. CFDs do not give you any rights in the underlying product

5.1. A CFD is to secure a profit or avoid a loss by reference to fluctuations in the price of the underlying product, rather than by taking delivery of any underlying product.

5.2. No CFD transaction shall confer on you any right, voting right, title or interest in any underlying product or entitle or oblige you to acquire, receive, hold, vote, deliver, dispose of or participate directly in any corporate action of any underlying product.

6. CFD markets are diverse, speculative and volatile

6.1. We may offer CFDs on a range of underlying product types (e.g., shares, indexes and currency pairs) and each of the underlying product types has risks that are specific to that type, for example with regard to the range and speed of price fluctuations and market liquidity.

6.2. You should make sure you understand the specific risks of the underlying product type before you trade the related CFDs. Derivative markets such as markets for CFDs can be highly volatile.

6.3. The prices of CFDs may fluctuate rapidly and over wide ranges and will be influenced by, among other things:

- i. the market price of the underlying product of the CFD,
- ii. the earnings and performance of the company or companies whose shares comprise the underlying product or a related index (for CFDs on shares and indexes),
- iii. the performance of the economy as a whole,
- iv. the changing supply and demand relationships for the underlying product or related instruments and indexes,
- v. governmental, commercial and trade programs and policies, interest rates, national and international political and economic events,
- vi. the prevailing psychological characteristics of the relevant marketplace.

7. Example of leverage and margin losses on CFDs

7.1. Margin Requirements for CFDs are subject to the Financial Conduct Authority's restrictions on the retail marketing, distribution and sale of CFDs set out in COBS 22.5 ("**FCA Rules**").

7.2. In addition, IBUK's Margin Requirements may exceed the levels prescribed in the FCA Rules. For example, if you purchase a CFD position on shares of ABC and the total value of the CFD position is £50,000, and if the Margin Requirement is 20%, you will be required to deposit £10,000 as margin.

7.3. If the value of the CFD position in ABC then drops to £35,000, you will have lost your original £10,000 deposit, plus an additional £5,000, which you will be required to pay to IBUK subject to the negative balance protection in the FCA Rules (this excludes commissions, spreads and financing costs).

8. IBUK has the right to liquidate your positions without notice in the event of a margin deficiency

8.1. You must monitor your account so that at all times the account contains sufficient funds to meet IBUK's Margin Requirements.

8.2. IBUK does not have to notify you of any failure to meet Margin Requirements prior to IBUK exercising its rights under its Agreement with you, including but not limited to its right to liquidate positions in your account subject to the FCA Rules.

8.3. IBUK will not issue margin calls; will not allow a grace period for you to meet intraday or other margin deficiencies; and is authorized to liquidate account

positions immediately in order to satisfy Margin Requirements, without prior notice.

8.4. Markets may "gap" or lose liquidity and IBUK may not be able to close out a position at a price that would avoid losses greater than your margin deposit.

8.5. Likewise, subject to the FCA Rules, IBUK may in its sole discretion delay or decide not to liquidate a position with a margin deficit. If you wish to avoid losses on any CFD position, you must close out the position yourself and not rely on IBUK to do so.

9. IBUK has the right to change or increase its margin requirements at any time

9.1. Margin Requirements for CFDs will be subject to the FCA Rules.

9.2. To the extent that IBUK's Margin Requirements exceed the margin levels prescribed by the FCA Rules, IBUK may modify Margin Requirements for any or all clients for any open or new positions at any time, in IBUK's sole discretion.

9.3. If we increase our margin requirements, it may prevent you from adding positions or hedging existing positions if you have insufficient equity.

9.4. If margin requirements increase on your existing CFDs, you will have to deposit additional equity in advance, or your positions may be liquidated as described above.

10. CFDs carry liquidity risk

10.1. IBUK is not obligated to provide quotes for any CFD at any time, and IBUK does not guarantee the continuous availability of quotations or trading for any CFD.

10.2. IBUK may in its sole discretion cease quoting CFDs and/or cease entering new CFD transactions at any time based on lack of market data, halts or suspensions or errors or illiquidity or volatility in the market for the underlying product, IBUK's own risk or profit parameters, technical errors, communication problems, market or political or economic or governmental events, Acts of God or Nature, or for other reasons.

11. You will pay commissions, spreads and financing charges among other costs of trading CFDs

11.1. IBUK will charge commissions on your CFD trades.

11.2. In addition, you will pay a spread on your CFD transactions, meaning that the price you pay to buy a CFD generally will be some amount higher than the theoretical market value of the CFD and the price you receive when you sell a CFD generally will be some amount lower than the theoretical market value of the CFD.

11.3. You will also pay financing charges (interest) on your long CFD positions (you may receive a rebate on your short CFDs or pay interest, depending on interest rates).

11.4. All of these costs will lower the total return (or increase the loss) on your investment in the CFD.

12. Risk of foreign currency fluctuation

12.1. When you deal in a CFD that is denominated in a currency other than the base currency or currency you have on deposit in your IBUK account, all margins, profits, losses and financing credits and debits in relation to that CFD are calculated using the currency in which the CFD is denominated.

12.2. Thus, your profits or losses will be further affected by fluctuations in the exchange rates between the account currency and the currency in which the CFD is denominated.

12.3. IBUK applies a margin "haircut" to reflect this risk, and so the Margin Requirement on the CFD will effectively be higher.

13. Risk of interest rate fluctuation

13.1. Interest rates fluctuate, which will affect the financing charges (or rebates) you will pay (or may receive) on your long (or short) CFD positions.

13.2. This will also affect your total profits or losses.

14. Risk of regulatory and taxation changes

14.1. Changes in taxation and other laws, government, fiscal, monetary and regulatory policies may have an adverse effect on the value of your CFDs, the tax you pay on your CFDs, and the total return on your CFDs.

15. IBUK has the right to correct trade errors

15.1. IBUK can cancel, adjust or close out CFD transactions after confirmation to you to correct errors.

15.2. This includes but is not limited to:

- i. CFD transactions executed at a time and price at or near which trades in the market for the underlying product were cancelled or adjusted by exchanges or market centers,
- ii. CFD transactions subject to technical errors in IBUK's platform, and
- iii. CFD transactions not reasonably related to the correct market price for the underlying product or CFD.

16. You may be unable to short CFDs or may suffer forced closeout of an open short position

16.1. Depending on regulations, stock loan and borrow market conditions, or other factors, short sales of CFDs on shares and indexes may or may not be allowed depending on the underlying product.

16.2. Further, subject to the FCA Rules, IB reserves the right, at any time in its sole discretion, to close out your open short CFD transaction.

17. IBUK's rights to adjust, modify and/or close-out CFD transactions in the event of a corporate action affecting the underlying product

17.1. In the event of a Corporate Action affecting the underlying product of a CFD on shares or indexes (e.g., splits, spin-offs, rights offerings, mergers and acquisitions, etc.):

- i. IBUK in its sole discretion will determine the appropriate adjustment or modification or action to take, if any, and when, with respect to the CFD to preserve the economic equivalent of the rights and obligations of the parties.
- ii. As an addition or alternative to the foregoing, IBUK reserves the right in its sole discretion to close out your open CFD position in the underlying product prior to the Corporate Action.

18. Risk of disruption or interruption of access to IBUK's electronic systems and services

18.1. IBUK relies on computer software, hardware and telecommunications infrastructure and networking ("**Systems**") to provide its services to clients, and without these Systems IBUK cannot provide the services.

18.2. These Systems and services are inherently vulnerable to disruption, delay or failure. This may result in loss of access to the IBUK trading platforms or may cause IBUK not to be able to provide CFD quotations or trading or may negatively affect any or all aspects of IBUK's services.

18.3. We do not guarantee these services will be operational at all times. There may be times when our services are unavailable due to maintenance; technical

issues; disruptions; or delays in service caused by circumstances beyond our control.

18.4. If constant service is important to you, you should ensure you have alternative trading arrangements in place in case the Systems fail.

19. Risks of after-hours trading

19.1. There are special characteristics and unique risks associated with trading in securities at times outside the ordinary trading hours for exchange(s) where the underlying shares are traded.

19.2. You should familiarise yourself with these risks, review the After-Hours Trading risk disclosure and determine whether After-Hours trading is appropriate for you in light of your objectives and experience. (Link: [Risks of After Hours Trading](#)).

PART B: Forex Risk Disclosure

This section describes the characteristics and risks of trading Spot Forex and Forex CFDs through IBUK. If you are trading Forex CFDs through IBUK, the risks described in this section are in addition to the risks described in the section above regarding CFDs.

Because of the leverage and the other risks disclosed here, you can rapidly lose all of the funds you deposit for forex trading and you may lose more than you deposit subject to the FCA rules.

1. Exchange rate risk

1.1. Exchange rates between foreign currencies can change rapidly due to a wide range of economic, political and other conditions, exposing you to risk of exchange rate losses.

1.2. If you are trading Forex using leverage (as with Forex CFDs) the impact of currency fluctuation is greater, and you are incurring more risk and the possibility for greater losses.

2. Nature of Forex transactions between you and IBUK

2.1. When you enter into a Forex transaction with IBUK, IBUK is the counterparty to your trade. Forex is not traded on a regulated exchange and is not cleared on a central clearinghouse. Thus, exchange and clearinghouse rules and protections do not apply to Forex trading with IBUK.

2.2. Since IBUK is the counterparty to your CFD trades, you are exposed to the financial and business risks, including credit risk, associated with dealing with IBUK. This means that in the unlikely event that IBUK was to become insolvent, it may be unable to meet its obligations to you.

2.3. The IBUK Forex trading platform is connected only to IBUK and you are accessing the trading platform only to transact with IBUK. You are not trading with any other entities or clients of IBUK by accessing such platform.

2.4. The availability and operation of the platform, including the consequences of the unavailability of the trading platform for any reason, is governed only by the terms of your IBUK Client Agreement.

2.5. When you enter into a Forex transaction with IBUK, IBUK may hold the risk of acting as counterparty itself or may hedge its risk by entering into an offsetting transaction with one of IBUK's affiliates, with another client that enters quotes into IBUK's system, or with a third party bank or liquidity provider ("**Forex Provider**").

2.6. In such transactions, the Forex Provider is not acting in the capacity of a financial adviser or fiduciary to you or to IBUK, but rather, is taking the other side of IBUK's offsetting trade in an arm's length contractual transaction.

2.7. You should be aware that IBUK or the Forex Provider may, from time to time, have substantial positions in and may make a market in or otherwise buy or sell instruments similar or economically related to, Forex transactions entered into by you.

2.8. IBUK and its Forex Providers may also undertake proprietary trading activities, including hedging transactions related to the initiation or termination of Forex transactions with IBUK, which may adversely affect the market price or other factors underlying the Forex transaction entered by you and, consequently, the value of such transaction.

3. **Prices on IBUK Forex transactions**

3.1. The prices quoted by IBUK to clients for Forex transactions will be determined in IBUK's discretion and/or based on Forex Provider quotes and are not determined by a competitive auction as on an exchange market.

3.2. Prices quoted by IBUK for Forex transactions therefore may not be the most competitive prices available.

4. Price slippage, order cancellation and adjustment

4.1. Prices quoted on IBUK's trading platform generally reflect the prices at which IBUK's Forex Providers are willing to trade.

4.2. Prices quoted reflect changing market conditions and therefore quotes can and do change rapidly. As such, when a client order is received and processed by IBUK's Systems, the quote on IBUK's platform may be different from the quote displayed when the order was sent by client. This change in price is commonly referred to as "slippage".

4.3. IBUK generally will not execute a client order at a certain price unless IBUK is able to trade at that price against one of IBUK's Forex Providers. If a client sends an order for a Forex transaction but client's requested price is no longer available and therefore the order is non- marketable, IBUK will not execute the order then but may place it in IBUK's limit order book in accordance with client's time-in-force instructions. IBUK may later execute the order if it becomes marketable.

4.4. Although IBUK attempts to obtain the best price for client orders on Forex transactions, because of the inherent possibility of transmission delays between and among clients, IBUK and Forex Providers, or other technical issues, execution prices may be worse than the quotes displayed on the IBUK trading platform.

4.5. To execute your order, IBUK generally engages in back-to-back transactions with one or more counterparties. These counterparties on occasion may cancel or adjust Forex trades with us in the event of market or technical problems. In these cases, IBUK may have to cancel or adjust Forex trades that you have executed.
