INTERACTIVE BROKERS GROUP ANNOUNCES 2Q2025 RESULTS

GAAP DILUTED EPS OF \$0.51, ADJUSTED¹ EPS OF \$0.51 GAAP NET REVENUES OF \$1,480 MILLION, ADJUSTED NET REVENUES OF \$1,480 MILLION

GREENWICH, CT, July 17, 2025 — Interactive Brokers Group, Inc. (Nasdaq: IBKR), an automated global electronic broker, announced results for the quarter ended June 30, 2025.

Reported and adjusted diluted earnings per share were both \$0.51 for the current quarter. For the year-ago quarter, reported diluted earnings per share² were \$0.41 and \$0.44 as adjusted.

Reported and adjusted net revenues were both \$1,480 million for the current quarter. For the year-ago quarter, reported net revenues were \$1,230 million and \$1,290 million as adjusted.

Reported and adjusted income before income taxes were both \$1,104 million for the current quarter. For the year-ago quarter, reported income before income taxes was \$880 million and \$940 million as adjusted.

Financial Highlights

(All comparisons are to the year-ago quarter.)

- Commission revenue increased 27% to 516 million on higher customer trading volumes. Customer trading volume in stocks, options and futures increased 31%, 24% and 18%, respectively.
- Net interest income increased 9% to \$860 million on higher average customer credit balances and securities lending activity. Net interest income includes an approximately \$26 million one-time credit related to recovery of taxes withheld at source.
- Other fees and services decreased 9% to \$62 million, led by a decrease of \$7 million in risk exposure fees, which was partially offset by a \$2 million increase in FDIC sweep fees.
- Execution, clearing and distribution fees increased 1% to \$116 million, driven by a new FINRA Consolidated Audit Trail ("CAT") fee initiated during the fourth quarter of 2024 and higher customer trading volumes in stocks, options and futures, mostly offset by greater capture of liquidity rebates from certain exchanges.
- General and administrative expenses increased 17% to \$61 million, driven primarily by an increase of \$8 million in advertising expenses.
- Pretax profit margin for the current quarter was 75% both as reported and as adjusted. For the year-ago quarter, pretax margin was 72% as reported and 73% as adjusted.
- Total equity of \$18.5 billion.

The Interactive Brokers Group, Inc. Board of Directors declared a quarterly cash dividend of \$0.08 per share. This dividend is payable on September 12, 2025, to shareholders of record as of September 1, 2025.

¹ See the reconciliation of non-GAAP financial measures starting on page 10.

² Prior period share and per share amounts have been retroactively adjusted to reflect the four-for-one forward stock split, effected in the form of a stock dividend, on June 17, 2025.

Business Highlights

(All comparisons are to the year-ago quarter.)

- Customer accounts increased 32% to 3.87 million.
- Customer equity increased 34% to \$664.6 billion.
- Total DARTs³ increased 49% to 3.55 million.
- Customer credits increased 34% to \$143.7 billion.
- Customer margin loans increased 18% to \$65.1 billion.

Other Items

Other income increased \$78 million to a gain of \$42 million. This gain mainly comprised (1) the non-recurrence of a loss of approximately \$48 million on positions taken over as a customer accommodation due to a technical issue at the New York Stock Exchange that occurred on the morning of June 3, 2024; (2) \$17 million related to our principal trading and investing activities; and (3) \$15 million related to our currency diversification strategy.

In connection with our currency diversification strategy, we base our net worth in GLOBALs, a basket of 10 major currencies in which we hold our equity. In this quarter, our currency diversification strategy increased our comprehensive earnings by \$301 million, as the U.S. dollar value of the GLOBAL increased by approximately 1.62%. The effects of the currency diversification strategy are reported as components of (1) Other Income (loss of \$5 million) and (2) Other Comprehensive Income (gain of \$306 million).

Note: The term "GAAP" in the following explanation refers to generally accepted accounting principles in the United States.

¹Adjusted net revenues, adjusted income before income taxes, adjusted net income available for common stockholders and adjusted diluted earnings per share ("EPS") are non-GAAP financial measures.

- We define adjusted net revenues as net revenues adjusted to remove the effect of our currency diversification strategy and our net mark-to-market gains (losses) on investments².
- We define adjusted income before income taxes as income before income taxes adjusted to remove the effect of our currency diversification strategy and our net mark-to-market gains (losses) on investments.
- We define adjusted net income available to common stockholders as net income available for common stockholders adjusted to remove the after-tax effects attributable to IBG, Inc. of our currency diversification strategy and our net mark-to-market gains (losses) on investments.
- We define adjusted diluted EPS as adjusted net income available for common stockholders divided by the diluted weighted average number of shares outstanding for the period.

Management believes these non-GAAP items are important measures of our financial performance because they exclude certain items that may not be indicative of our core operating results and business outlook and may be useful to investors and analysts in evaluating the operating performance of the business and facilitating a meaningful comparison of our results in the current period to those in prior and future periods. Our currency diversification strategy and our mark-to-market on investments are excluded because management does not believe they are indicative of our underlying core business performance. Adjusted net revenues, adjusted income before income taxes, adjusted net income available to common stockholders and adjusted diluted EPS should be considered in addition to, rather than as a substitute for, GAAP net revenues, income before income taxes, net income attributable to common stockholders and diluted EPS.

² Mark-to-market on investments represents the net mark-to-market gains (losses) on investments in equity securities that do not qualify for equity method accounting, which are measured at fair value; on our U.S. government and municipal securities portfolios, which are typically held to maturity; and on certain other investments.

³ The income tax effect is estimated using the statutory income tax rates applicable to the Company.

⁴ Prior period share and per share amounts have been retroactively adjusted to reflect the four-for-one forward stock split, effected in the form of a stock dividend, on June 17, 2025.
